Outline for February 17, 2012

Reading: §18

1. Local variables
   a. Call stack
   b. Allocating local variables
   c. Storing parameters (arguments)
2. Global variables
   a. Scope
3. Recursion
   a. Factorial example [*nfact.py*]
   b. Fibonacci example [*rfib.py*]
   c. Linear search program [*rlinsearch.py*]
