Outline for March 12, 2012

1. Midterm #2 Review
2. Recursion review
   a. Base case (terminating case)
   b. Recursive call
3. Example: list of permutations of string [perm.py]
   a. Base case: empty string gives list of empty string
   b. Recursive part:
      i. Remove first letter
      ii. Generate list of permutations of rest of string
      iii. New list: first letter in all positions for all elements of list
