

Lecture 15 Outline

October 28, 2015

Reading: *text*, §1–8

1. Greetings and felicitations!
 - a. Midterm on Friday, in class — closed everything except your mind!
 - b. 5 multiple choice, 4 longer-answer questions
 - c. Most on C; everything covered in class or in the book is fair
 - d. Questions on Linux confined to the very basic things like redirection, *ls(1)*, *rm(1)*, *cp(1)*, *mv(1)*, *ps(1)*, and so forth, and the hierarchical file system
2. Walk through pointer stew program (*ptrstew.c*)
3. Review
