

Lecture 26 Outline

November 25, 2015

Reading: *text*, §11

1. Greetings and felicitations!
 - a. Midterms are in my office; you can come get them there.
 - b. Homework 5 is last homework
 - c. I will schedule a review session on December 7 or 8, depending on when I can get a room
2. Prof. Chen's postfix program
 - a. Enable it to read numbers of multiple digits
 - b. Add save, load stack
3. Files
 - a. Review files and file pointers — mention file descriptors as underlying mechanism
 - b. Standard I/O library (*stdio.h*)
 - c. Standard input, output, error (**`stdin`**, **`stdout`**, **`stderr`**)
 - d. Opening, closing files (*fopen*, *fclose*)
4. Binary file I/O
 - a. Reading with *fread*
 - b. Writing with *fwrite*
