Outline for March 5, 2007

1. Greetings and Felicitations!
2. Transitive nonlattice policies
   a. Quasi-ordered sets
3. Nontransitive policies
   a. Dual mappings
   b. Theorem: a dual mapping from a reflexive information flow policy into an ordered set is order-preserving
4. Compiler-based flow mechanisms
   a. Scalar declarations
   b. Array declarations
   c. Assignment statements
   d. Compound statements
   e. Conditional statements
   f. Iterative statements
   g. Goto statements
   h. Procedure calls
