Extra Credit #2

Due: February 7, 2023

Consider the construction in Section 3.5.2 that shows how to simulate three-parent joint creation using two-parent joint creation (this is on pp. 84–87 of the text). In the original paper, \( cr_c(s, c) = c/R_3 \) (that is, the \( t \) right was omitted) and \( link_2(S, A_3) = A_3/t \in \text{dom}(S) \) (the second part was omitted). Why won’t this work?
