

## Quiz #3 for October 8, 2020

Please use your Python system (IDLE or something else) to compute the following. Be prepared to show your work!

1. Here are a set of numbers:

122 74 95 188 174 17 43 8 70 114 117 37

Please write a program to print them in a table with 3 rows and 4 columns, and line the numbers in each column up by the ones digit.

*Answer: Here is one such program:*

```
print("%3d %3d %3d %3d" % (122, 74, 95, 188))
print("%3d %3d %3d %3d" % (174, 17, 43, 8))
print("%3d %3d %3d %3d" % (70, 114, 117, 37))
```

*There are many other variations. In all cases, the output should be:*

```
122  74  95 188
174  17  43   8
 70 114 117  37
```
