Extra Credit 1

Due: October 6, 2021   **Points:** 20

Add exception handling to the answer for problem 1, so that if the input is not a number, the program prints an error message.

In the second example below, notice there are two decimal points (which is not allowed).

To turn in: Please turn in the program in the file *tweightcvt-ex.py*.

Examples:

```
Enter temperature in degrees Fahrenheit: hello
The input must be a real number

Enter temperature in degrees Fahrenheit: 100..5
The input must be a real number
```
