**Bimonthly Online Journal**

The **KSII Transactions on Internet and Information Systems (TIIS)** is online scholarly journal sponsored by **KSII** and supported by **KETI**. The Transactions is published every other month. The Transactions is designed to allow readers to obtain the most state of the art in a number of focusing areas related to wired & wireless internet and information systems. The technologies and applications of IT are very rapidly changing and updating. Thus quick publishing and distribution to researchers, developers, deployment engineers, technical managers, and educators are crucial. Our most important aim is to publish the accepted papers [within 1~3 months online](#) after receiving the manuscript. The published papers online will be published again in offprint by an internationally prestigious publishing company. The Transactions consists of regular and special issue papers. The papers are strictly peer-reviewed. Both theoretical and practical contributions are encouraged. The editors well-renowned in the world including the editor-in-chief of IEEE Transactions serve for our quality journal.

■ The scope of interests of the Transactions includes, but is not limited to, the following:

- Wireless sensor networks
- Ubiquitous and pervasive computing
- Security in all areas
- Digital contents
- Mobile and ad-hoc network communications
- Cognitive radio and wireless networks
- WiBro/WiMax and MIMO/OFDM
- HCI (including multimedia, graphics, and haptics)
- H/W and S/W systems co-design
- Process-aware information systems
