

Extra Credit 2

Due: October 29, 2025

Points: 50

In the given examples, what you type is in **red** and the program prints what is in black. The symbol `\n` means a carriage return (return, enter).

Your program output should look like the output in the examples, except that what you type won't be in red.

1. (50 points) Repeat problem 1 of the homework, but this time read from the Excel spreadsheet "medical_records.xlsx" and calculate the statistics using the *pandas* module.
To receive credit, you **must** use the *pandas* module.
